

Zebrold IHL â Annual Report & ESG Impact Review 2025/26

Audited Financials, Net-Zero Corridor Decarbonisation & Corporate Governance

Document Ref: ZEB-ESG-2025-26 â Published: July 2026 â Global ESG Reporting Framework (GRI & EU Taxonomy Aligned)

1. GROUP CHAIRMAN & DIRECTORATE LETTER

Fiscal year 2025/26 marked an inflection in continental rail procurement. As international transport authorities accelerate net-zero mandates, Zebrold International Holdings Limited delivered 142 electric and battery-hybrid trainsets, eliminating an estimated 480,000 metric tonnes of CO2 equivalents compared with equivalent diesel-powered regional operations.

2. ENVIRONMENTAL SUSTAINABILITY & MATERIAL STEWARDSHIP

Every Scolome trainset achieves a verified 94.8% material recyclability rate at end-of-life under EN 45545 European directives. Our lightweight carbon-reinforced aluminium carbody shells reduce aerodynamic parasitic drag by 14%, enabling industry-leading energy efficiency metrics of 0.00 g CO2/pkm when paired with certified green grid electricity.

3. BILATERAL GOVERNANCE & SOCIAL INTEGRITY

The dual-headquarters operational model in Germany and India fosters deep transnational skill transfer, maintaining a global technical workforce of over 3,400 specialized engineers, researchers, and field commissioning specialists. Zero lost-time injuries were logged across high-voltage testing lines during the reporting period.

4. CONSOLIDATED FINANCIAL POSITION & SHAREHOLDER VALUE

Net cash flows from operating activities rose to â¬218m. Return on capital employed (ROCE) reached 19.2%, demonstrating the superior capital efficiency of modular series train production compared to legacy bespoke manufacturing programs.
