

Zebrold IHL â Q3 2026 Interim Financial Statement

Commercial Performance, Corridor Contracts & Rolling Stock Delivery

Document Ref: ZEB-FIN-2026-Q3 • Release Date: 12 August 2026 • Classification: Public Investor Report

1. EXECUTIVE PERFORMANCE OVERVIEW

Zebrold International Holdings Limited reports resilient third-quarter commercial performance, supported by continental trainset delivery expansions, turnkey EPC electrification milestones, and growing recurring revenues across the Scolome TwinOS predictive signalling division. Group revenues reached â1.62bn annualized, marking sustained double-digit growth across both European passenger modernization lines and Indian freight and regional transit networks.

2. OPERATING MARGINS & SEGMENT FINANCIALS

Consolidated EBITDA margin expanded to 18.4%, driven by vertical supply-chain integration of silicon carbide (SiC) traction inverters and synchronized modular fabrication across Frankfurt, Kassel, and Bengaluru. Rolling stock accounted for 45% of turnover (â729m), Turnkey EPC and permanent way reached 25% (â405m), and Digital Transit systems delivered 18% (â291m). Depot lifecycle maintenance contracts expanded order book visibility to 30+ operational years.

3. STRATEGIC TRANSNATIONAL INTEGRATION

Operational synchronization between German functional safety compliance (CENELEC EN 50126/50128/50129 SIL-4) and Indian RDSO telematics provers continues to yield structural competitive advantages in bidding for cross-border high-speed rail concessions. Working capital metrics improved by 14 days YoY following automated robotic sub-assembly commissioning in Kassel.

4. CAPITAL EXPENDITURE & OUTLOOK

Full-year revenue guidance is affirmed in the range of â1.58bn to â1.65bn. Planned R&D expenditures remain targeted at hydrogen-hybrid traction prototypes and satellite-based ETCS Level 3 moving block signalling architectures.
